Yes, it is being cited in the data report, and we can address in the QnAs, too.

Thanks. We may want to put that method as a Q&A response on our website.

Ed,
The analysis of the rinsates was based on the EPA method 537.1.
Yes, we will send the methods along with the results

Thanks
Thuy

Not sure what the last sentence means. Do we know where the rinsate method is housed on a website?
I am talking with Rise members right now. These are some of the questions in the chat.

Method for the rinsate is already published; method for the substance will be released with the data – will need to follow the rinsate data due to the need for method validation, which is actively happening.

Are we testing other fluorinated containers and other containers from other flourinators?
